

Arsam Sarkhosh

Software Developer

Iran | arsamsarkhosh4@gmail.com

[GitHub / fatdarkness6](#) | [LinkedIn / Arsam Sarkhosh](#)

Software developer working on web products and business applications. My experience includes Vue/Nuxt interfaces, multilingual websites, backend APIs, CMS integrations and deployment, alongside Python/FastAPI document processing and AI-assisted retrieval in DocIntel.

PROFESSIONAL EXPERIENCE

Arvand Termo Tec / Full Stack Developer

Italy / Remote / Part-time | Jul 2026 - Present

- Configured Strapi CMS and refactored 250+ frontend files, removing duplicated code and improving maintainability.
- Built responsive sections and fixed localization, navigation, Swiper and image issues across languages.

Arilvo / Frontend Developer

Italy / Remote / Part-time | Jul 2026 - Present

- Built the Nuxt/Vue frontend from scratch with reusable Quasar components, GSAP interactions and Italian, English and German localization.
- Optimized frontend performance, managed production deployment and prepared the architecture for future backend and dynamic-content integration.

Raymand Group / Full Stack Developer

Tehran, Iran / Hybrid / Full-time | Jun 2025 - Aug 2026

- Built responsive Nuxt/Vue interfaces with SSR, a headless CMS and i18n for dynamic multilingual content.
- Collaborated on API and authentication integration, localization and deployment; improved performance and cross-browser compatibility.

Gruppodanesh / Frontend Developer

Italy / Remote / Full-time | Jun 2024 - Nov 2025

- Owned the website's architecture and implementation, maintaining a clean and scalable React codebase.
- Built custom traffic and engagement analytics; improved performance, responsiveness and user experience.

Ability Tech Australia / Frontend Developer

Australia / Remote / Part-time | Dec 2024 - Mar 2025

- Integrated backend APIs into Nuxt 3, Quasar and TypeScript interfaces for creating, retrieving, updating and deleting records.
- Built structured data-management forms, customer feedback and review workflows with a responsive, maintainable interface.

Miarze / Frontend Developer

Tehran, Iran / Part-time | Nov 2024 - Mar 2025

- Built a dynamic Nuxt 2 menu that adapts item heights to the available viewport, keeping navigation accessible.
- Integrated an external AI service for product evaluation, with responsive interfaces and efficient API-driven data presentation.

TECHNICAL PROFILE & PROJECTS

Arsam Sarkhosh / Software Developer

TECHNICAL SKILLS

Frontend: Vue, Nuxt, React, Next.js, Quasar, Pinia, TypeScript, JavaScript, HTML, CSS, GSAP

Backend & data: Node.js, Express, Python, FastAPI, REST APIs, Authentication, PostgreSQL, SQLAlchemy, Strapi

AI & delivery: RAG, OpenAI, Embeddings, pgvector, SEO, Internationalization, Deployment, Production debugging

PROJECT PORTFOLIO

ARILVO - Frontend development for a multilingual MEP/BIM company website, with Nuxt SSR, localization and SEO.

DOCINTEL - Document intelligence frontend for summaries, Q&A and spreadsheet insights. Frontend preview is live. The backend is not deployed, so API-powered features are unavailable online.

ARVAND TERMO TEC - HVAC site work across Strapi CMS, refactoring and localization.

RAYMAND GROUP - A corporate website for Raymand Group, with Persian, English and German content and responsive Nuxt interfaces.

DOCINTEL BACKEND - FastAPI document intelligence API with cited RAG answers, spreadsheet analysis and SSE progress updates. Public source code is available on GitHub. The backend API is not deployed.

Miarze - Adaptive Nuxt navigation and an AI-connected product-rating interface.

Gruppodanesh - React company website with SPA behavior and visit-tracking features.

Hugo Australia - Nuxt 3, Quasar and TypeScript SaaS forms with CRUD API integration, feedback and reviews.

Strubuono - Personal SaaS that turns user prompts into AI-generated website design data, with feedback collection.

Raymand Backend - A separate backend repository with APIs, authorization and database structure.

Arsam's Quiz - Responsive Vue and Pinia quiz app with API questions, validation and localStorage history.

CoinCap - React application that fetches and displays live cryptocurrency prices.

EDUCATION & CONTINUED LEARNING

Diploma in Mathematics & Physics

Sep 2022 - Jan 2026

Combined formal education with self-directed software projects, focusing on web architecture, databases and modern JavaScript frameworks.

Junior Front-End Developer / Coding Front | Mar 2023 - Jun 2023

Just React / Coding Front | Dec 2023 - Feb 2024

Languages: English C1

Interests: Reading, Coding side projects, Web development, Fitness
