

Arsam Sarkhosh

Full-Stack Engineer

Iran | arsamsarkhosh4@gmail.com

[GitHub / fatdarkness6](#) | [LinkedIn / Arsam Sarkhosh](#)

Full-stack engineer specializing in Nuxt, Vue, Node.js and Python. Experienced in production web applications, backend APIs, SaaS interfaces and multilingual business platforms, with a growing focus on AI-powered document intelligence and retrieval-augmented applications.

PROFESSIONAL EXPERIENCE

Arilvo / Full-Stack Engineer

Italy | Aug 2026 - Sep 2026

- Owned architecture, UI/UX, Nuxt and Quasar development, SEO, localization and deployment from the ground up.
- Built reusable components and GSAP interactions, with Italian, English and German content and a foundation for future backend integration.

Arvand Termo Tec / Full-Stack Engineer

Italy | Jul 2026 - Aug 2026

- Integrated Strapi into a Next.js application and refactored and reorganized more than 256 files for maintainability.
- Built a responsive hero and resolved localization, routing, invalid URL and Swiper image-transition issues while removing unnecessary code.

Raymand Group / Full-Stack Developer

Tehran, Iran | Since Jun 2025

- Built Nuxt frontend features, supporting backend endpoints, API integrations, forms and validation for a platform serving three companies.
- Maintained reusable Quasar components, adjusted database responses to UI needs and fixed production issues after updates.

Gruppodanesh / Front-End Developer

Venice, Italy | Jul 2024 - Nov 2025

- Developed the company's React website and implemented SPA features for a smoother user experience.
- Built visit-tracking features to give the client insight into website usage and opportunities for improvement.

Pouya Salamat Fartak / Front-End Developer

Tehran, Iran | Sep 2024 - Aug 2025

- Worked as one of four frontend developers in a nine-person team preparing a Nuxt SaaS application.
- Integrated REST APIs and implemented structured forms for creating, retrieving, editing and deleting records.

Miarze / Front-End Developer

Tehran, Iran | Dec 2024 - May 2025

- Improved the user interface and responsive behavior across devices.
- Built adaptive Nuxt navigation for large menus and an interface connected to AI-based product rating.

TECHNICAL PROFILE & PROJECTS

Arsam Sarkhosh / Full-Stack Engineer

TECHNICAL SKILLS

Frontend: Vue, Nuxt, React, Next.js, Quasar, Pinia, TypeScript, JavaScript, HTML, CSS, GSAP

Backend & data: Node.js, Python, FastAPI, REST APIs, JWT authentication, SQL, PostgreSQL, MongoDB, Strapi

AI & delivery: RAG, OpenAI, Embeddings, pgvector, SEO, Internationalization, Deployment, Production debugging

PROJECT PORTFOLIO

ARILVO - Multilingual MEP/BIM platform I built with Nuxt SSR and SEO.

DOCINTEL - Document intelligence frontend for summaries, Q&A and spreadsheet insights. Frontend preview is live. The backend is not deployed, so API-powered features are unavailable online.

ARVAND TERMO TEC - HVAC site work across Strapi CMS, refactoring and localization.

RAYMAND GROUP - Business website built with Nuxt, Node.js and MongoDB.

DOCINTEL BACKEND - FastAPI document intelligence API with cited RAG answers, spreadsheet analysis and SSE progress updates. Public source code is available on GitHub. The backend API is not deployed.

Miarze - Adaptive Nuxt navigation and an AI-connected product-rating interface.

Gruppodanesh - React company website with SPA behavior and visit-tracking features.

Hugo Australia - Nuxt 3, Quasar and TypeScript SaaS forms with CRUD API integration, feedback and reviews.

Strubuono - Personal SaaS that turns user prompts into AI-generated website design data, with feedback collection.

Raymand Backend - Backend APIs, authorized access and database structure for the Raymand platform.

Arsam's Quiz - Responsive Vue and Pinia quiz app with API questions, validation and localStorage history.

CoinCap - React application that fetches and displays live cryptocurrency prices.

EDUCATION & CONTINUED LEARNING

Diploma in Mathematics & Physics

Sep 2022 - Jan 2026

Combined formal education with self-directed software projects, focusing on web architecture, databases and modern JavaScript frameworks.

Junior Front-End Developer / Coding Front | Mar 2023 - Jun 2023

Just React / Coding Front | Dec 2023 - Feb 2024

Languages: English C1 / Italian A1

Interests: Reading, Coding side projects, Web development, Fitness
